MD

“ It was difficult to get past Bel's prickliness, however, if she trusted you to keep confidences you would be as close to acceptance as a friend as was possible. When she entrusted the care of her cats to me while she was out of town (Albuquerque), that was a big step for her. I hope that someone took over the care of your cats, Bel, and that you are now resting in peace.

Mary DeWitt - May 01, 2016 at 10:30 AM

MD

1979 B.S. Georgia State University  
1984 Ph.D. in astronomy, University of Arizona  
University of New Mexico, Professor of Physics, 1987-2006.  
Research: Optical, infrared and radio astronomy, multi-wave observations of the radiative and morphological properties of young stellar objects, star formation.

Sheila  
Mallory

She was extremely good to me while I was a student at UNM. Does anyone know why she passed away?
